## RATIONALE

The **National Congress of the Italian Society for Virology** represents the annual forum for the Italian scientists

working in the different areas of Virology (medical-clinical Virology, molecular Virology, veterinary Virology, environmental and plant Virology) involving basic, clinical and translational research and taking advantage of the most advanced technological platforms.

In keeping with the tradition, the scientific structure of Congress features different thematic sessions: antiviral therapy, emerging viruses and zoonosis, environmental and plant virology, human viral diseases, infection & immunity and vaccinology, veterinary virology, viral diagnosis, viral genetics and biotechnology, viral oncology, virus-host interactions. Every session starts with a Keynote Lecture followed by oral communications selected from the "Call for Abstracts".

Poster Exhibition and Discussions complete the scientific structure of the Congress. The 3<sup>rd</sup> National Congress of the Italian Society for Virology has been accredited to the Italian Ministry of Health for CME Credits for the following professionals: Medical Doctor (all disciplines), Biologist, Biotechnologist, Medical laboratory technician, Veterinary, Pharmacist, Physicist and Chemist.
